

Kseibi 10 in. Straight Jaw Locking Plier with Wire Cutter

Lock, grip and cut with confidence

Kseibi · 141345

Highlights

- 10 in. / 250 mm size for balanced reach and control
- Straight jaws grip flat, square and hex materials
- Integrated wire cutter adds everyday versatility
- Made from durable #45 carbon steel
- Nickel-plated finish for a clean, protected surface
- Locking action frees your hands during tasks
- Adjustment screw helps set clamping pressure
- Orange plastic-coated handle for added comfort
- Useful for workshop, garage and maintenance jobs
- Supplied in double blister card packing

Key Features

- Straight Jaw Design — The straight jaw profile provides broad contact for gripping flat stock, square sections and hex-shaped hardware securely.
- Integrated Wire Cutter — A built-in wire cutter increases utility, letting you clamp and cut with the same tool when the job calls for it.
- #45 Carbon Steel Build — Constructed from #45 carbon steel for dependable strength suited to regular gripping, clamping and maintenance work.
- Nickel-Plated Finish — The nickel-plated surface helps protect the tool and gives it a durable, professional-looking finish.
- Adjustable Locking Pressure — The end adjustment screw lets you fine-tune jaw opening and clamping force for different materials and applications.
