

Kseibi 10 in Sheet Metal Locking Plier

Lock in sheet metal control

Kseibi · 141360

Highlights

- 10 in 250 mm locking plier for sheet metal work
- Wide jaw shape helps grip flat metal securely
- Made from durable #45 carbon steel
- Nickel-plated finish for added surface protection
- Orange plastic-coated handle for comfort
- Adjustable screw helps fine-tune clamping pressure
- Quick-release lever supports faster repositioning
- Useful for bending, folding and holding sheet metal
- Good fit for fabrication, HVAC and repair tasks
- Supplied in double blister card packing

Key Features

- Sheet Metal Jaw Design — Wide, flat jaws are suited to gripping sheet metal for bending, clamping and alignment work.
- #45 Carbon Steel Build — Constructed from #45 carbon steel for dependable strength in regular workshop use.
- Nickel-Plated Finish — Nickel plating adds a protective surface finish and a clean professional appearance.
- Adjustable Locking Action — The locking screw allows you to set the grip pressure for different material thicknesses and tasks.
- Comfort-Coated Handle — Orange plastic-coated handle improves comfort and provides a more secure feel during use.
