

Kseibi 11 in C-Clamp Locking Pliers with Swivel Pads

Secure clamping with hands-free control

Kseibi · 141380

Highlights

- #45 carbon steel construction for dependable strength
- Nickel-plated finish helps resist surface wear
- Swivel pads adapt to uneven contact points
- Locking mechanism maintains clamping pressure
- Adjustment screw lets you fine-tune grip force
- Quick-release lever for controlled unlocking
- 11 in / 280 mm size suits workshop use
- Wide C-clamp frame reaches around workpieces
- Orange plastic-coated handle improves comfort
- Ideal for welding, fabrication and repair tasks

Key Features

- Heavy-duty steel body — Constructed from #45 carbon steel for reliable strength in demanding clamping and holding applications.
- Nickel-plated finish — The nickel-plated surface helps protect the tool and supports durability in regular workshop use.
- Swivel pad contact points — Pads pivot to sit more evenly on irregular surfaces for a more stable grip across different jobs.
- Adjustable locking pressure — A screw adjustment at the handle end lets you set the clamping force to match the material and task.
- Comfortable handled grip — The orange plastic-coated handle provides a more secure and comfortable feel during setup and release.

Specifications by Variant

Specification	141380
Material	#45 carbon steel
Surface finish	Nickel-plated

Color	Orange plastic-coated handle (158C)
Size	11" 280 MM
Packing	Double Blister Card Packing
