

Kseibi 10" Left Cut Aviation Tin Snips

Controlled left cuts with durable CrV blades

Kseibi · 142030

Highlights

- Left cut aviation snips for controlled directional cutting
- Chrome Vanadium blade construction
- 10" / 250 mm overall size
- Sandblasted blade head surface
- Bi-material handles shown for comfort and grip
- Textured grip zones help improve control
- Compound-action aviation snip design
- Slim nose aids access in tighter areas
- Protective handle flares support secure handling
- Supplied in hanging card packing

Key Features

- Left Cut Pattern — Designed for left-hand curves and directional sheet metal cutting where control and accuracy matter.
- Chrome Vanadium Blades — Built with Chrome Vanadium for a durable cutting edge suited to regular workshop, site and maintenance tasks.
- 10 Inch Size — The 10" 250 mm format offers a practical mix of leverage, reach and maneuverability for everyday cutting jobs.
- Secure Comfort Grip — Bi-material handles with textured grip areas, as shown, help reduce slip and support steadier handling.
- Work-Ready Blade Finish — A sandblasted blade head surface gives the cutting head a durable, professional finish.
