

Kseibi Aluminium Telescoping Lopper with SK5 Blade

Reach further, prune cleaner

Kseibi · 143070

Highlights

- Telescoping design helps reach higher branches
- Aluminium handles support lighter handling
- SK5 blade is built for pruning performance
- Polished blade finish for a clean, refined edge
- Long handles improve leverage while cutting
- Comfort grips help maintain secure control
- Suitable for shrubs, branches and garden shaping
- Useful for pruning hard-to-reach growth
- 1.0M feature specification in technical data
- Supplied in hanging card packing

Key Features

- Telescoping Reach — Extend the handles to reach branches that are harder to access during routine pruning and garden maintenance.
- Aluminium Handle Construction — Aluminium handles help keep the tool practical to handle while supporting strength for regular outdoor use.
- SK5 Blade — The cutting blade is made from SK5, a material specified for dependable pruning work and clean cutting action.
- Polished Surface Finish — A polished blade finish gives the cutting head a smooth, refined surface suited to repeated garden use.
- Comfort Grip Handles — The grips shown on the handles provide a more secure and comfortable hold for better control while cutting.
