

Kseibi Forged Steel Garden Transplanter

Precise planting starts here

Kseibi · 143330

Highlights

- ❑ Forged steel construction for reliable strength
- ❑ Black powder-coated surface helps protect the tool
- ❑ Designed for transplanting, planting and soil moving
- ❑ Compact 290 mm length for easy handling
- ❑ Two-colour plastic handle with black TPR grip
- ❑ Comfortable grip for controlled garden work
- ❑ Useful for beds, borders, pots and raised planters
- ❑ Forked tip helps loosen soil around roots
- ❑ Hanging hole allows easy storage
- ❑ Straightforward hand tool for detailed planting tasks

Key Features

- ❑ Forged steel body — Made from forged steel for dependable strength during digging, loosening and transplanting work.
- ❑ Powder-coated finish — The black powder-coated surface adds protection to the working end and suits regular garden use.
- ❑ Comfort grip handle — Orange and black plastic handle with black TPR grip areas helps provide a secure, comfortable hold.
- ❑ Compact working size — At 290 mm long, it offers easy control for precise tasks in smaller spaces and planted areas.
- ❑ Transplanting-focused design — The shaped blade and forked end shown are well suited to opening soil, lifting small plants and settling roots in place.
