

Kseibi Forged Steel Garden Harrow with TPR Grip

Compact strength for everyday soil work

Kseibi · 143340

Highlights

- ❑ Forged steel head for dependable hand cultivation
- ❑ Black powder-coated finish on the metal parts
- ❑ 300 mm size for controlled work in tight spaces
- ❑ Three tines help loosen and refresh garden soil
- ❑ Ideal for flower beds, borders and vegetable patches
- ❑ Comfortable orange/black plastic handle design
- ❑ Black TPR grip supports a secure hold in use
- ❑ Good for breaking surface crust and light aeration
- ❑ Compact format for easy storage between jobs
- ❑ Supplied in hanging card packing

Key Features

- ❑ Forged steel construction — Built with a forged steel head for reliable strength during loosening, cultivating and general bed maintenance.
- ❑ Protective powder-coated finish — The black powder-coated surface helps protect the metal while giving the tool a clean, hard-wearing finish.
- ❑ Comfort-focused handle — The orange and black two-colour plastic handle with black TPR is designed for a comfortable, confident grip.
- ❑ Compact 300 mm size — Its 300 mm overall size makes it easy to handle in smaller beds, containers and other confined garden areas.
- ❑ Precise hand cultivation — The compact head and visible three-tine design help you work soil accurately around plants and along borders.
