

Kseibi Forged Steel Hand Cultivator Hoe 290mm

Loosen, weed and prep with one compact tool

Kseibi · 143345

Highlights

- ❑ Forged steel construction for dependable garden use
- ❑ Black powder-coated finish helps protect the tool surface
- ❑ Cultivator hoe design for loosening and weeding
- ❑ Compact 290 mm length for controlled hand work
- ❑ Ideal for beds, borders, pots and raised planters
- ❑ Pointed tines help break up and comb through soil
- ❑ Orange and black handle is easy to spot in the shed
- ❑ Black TPR grip supports comfort during repetitive tasks
- ❑ Handle includes a hanging hole for simple storage
- ❑ Supplied in hanging card packing

Key Features

- ❑ Forged steel body — Built from forged steel for reliable strength during regular soil loosening, weeding and light cultivation tasks.
- ❑ Powder-coated finish — The black powder-coated surface adds durability and helps the tool stand up to everyday garden use.
- ❑ 2-in-1 working head — Combines hoe and cultivator functions so you can break up soil, disturb weeds and tidy planting areas with one tool.
- ❑ Comfort grip handle — Orange and black two-colour plastic handle with black TPR offers a secure, comfortable hold for controlled use.
- ❑ Compact 290 mm size — The manageable length is well suited to precise work in smaller spaces such as borders, containers and raised beds.
