

Kseibi Carbon Steel Shovel with Wooden Handle

Built for everyday digging

Kseibi · 143360

Highlights

- Carbon steel shovel head for dependable digging strength
- Powder-coated matte black finish helps protect the head
- Grade-A toon wood straight handle for solid control
- 150 cm overall handle length after assembly
- 280 x 235 mm shovel head for general-purpose use
- 1 kg shovel head offers a sturdy working feel
- Suitable for soil, compost, sand and loose material
- Broad blade shape helps move material efficiently
- Straightforward design for garden and outdoor tasks
- Good choice for routine home or trade use

Key Features

- Carbon Steel Head — The shovel head is made of carbon steel to provide the strength needed for regular digging, scooping and shifting tasks.
- Powder-Coated Finish — A matte black powder-coated surface helps protect the shovel head and gives the tool a clean, durable-looking finish.
- Long Wooden Handle — The straight Grade-A toon wood handle offers comfortable reach and practical leverage for ground-level work.
- Balanced Working Size — With a 280 x 235 mm head, this shovel is sized for everyday garden and yard jobs where control and capacity both matter.
- Versatile Outdoor Use — Ideal for moving soil, compost, sand and similar loose materials in gardens, landscaping projects and general outdoor maintenance.
