

Kseibi Double Suction Cup Lifter

Secure grip for smooth-surface handling

Kseibi · 211015

Highlights

- Double suction cup design for steadier handling
- Helps lift and position smooth, flat materials
- ABS material body for lightweight practicality
- Compact 118 mm size stores easily in tool kits
- Bridge handle supports balanced carrying control
- Black snap-style locking levers for quick operation
- Bright orange cups are easy to spot on site
- Useful for fitting, aligning, and repositioning tasks
- Designed for contractor and workshop applications
- Simple manual engagement and release system

Key Features

- Twin Cup Layout — Two suction cups provide a more balanced hold across the surface for improved control during lifting and positioning.
- ABS Construction — Made from ABS material for a practical combination of light weight and everyday durability.
- Compact Size — With a listed dimension of 118 mm, it is easy to carry, store, and keep close at hand for frequent tasks.
- Locking Lever Operation — Black snap-style levers are designed for straightforward manual locking and release when placing or removing the lifter.
- Trade-Ready Handling Aid — Suitable for contractors and installers who need better grip and control when moving smooth, flat materials.
