

Kseibi Triple Suction Cup Lifter, Aluminium

Steady lifting for smooth surfaces

Kseibi · 211055

Highlights

- Triple suction cup layout for broader contact
- Aluminum alloy body for durable everyday use
- Chrome-plated finish for a clean, professional look
- Designed for smooth, flat surface handling
- Useful for glass, tiles and sheet materials
- Three locking levers for cup-by-cup engagement
- Rigid frame helps maintain stable control
- Helps position materials with less edge handling
- Compact 118 MM dimension listed in specs
- Supplied in box packing

Key Features

- Three-Cup Design — The triple suction layout helps distribute contact across the surface for steadier lifting and positioning of suitable smooth materials.
- Aluminum Alloy Construction — Built from aluminum alloy to provide a practical balance of strength, durability and manageable weight for regular handling tasks.
- Chrome-Plated Finish — The chrome-plated surface adds a clean finish and a professional appearance suited to workshop, site and installation use.
- Individual Locking Levers — Each suction cup features its own lever, allowing controlled engagement and release during lifting and placement.
- For Smooth Surface Work — Well suited to handling glass, tiles and other flat, non-porous materials where a suction hold can aid movement and positioning.
