

Kseibi U-Base Slab Dolly 8 x 30 cm

Stable support for slab handling

Kseibi · 211189

Highlights

- U-base channel helps support slab edges securely
- Twin-wheel design promotes stable rolling movement
- Compact 8 x 30 cm format for easy handling
- Steel body built for repeated site and workshop use
- Suitable for slabs, panels and sheet materials
- Low-profile layout helps improve load stability
- Useful for workshops, warehouses and job sites
- Helps reduce strain when moving bulky materials
- Simple design for quick loading and repositioning
- Kseibi slab dolly for controlled manual transport

Key Features

- **U-Base Support** — The steel U-shaped channel helps cradle the edge of slabs and sheet materials for steadier transport.
- **Twin-Wheel Stability** — Two wheels provide balanced support and smoother rolling when moving flat, heavy materials.
- **Compact Working Size** — The 8 x 30 cm format is easy to position under loads and practical in tighter work areas.
- **Durable Steel Construction** — The metal body is designed to handle repeated loading, unloading and everyday job site use.
- **Versatile Material Handling** — Suitable for transporting panels, slabs and other flat stock in workshops, storage areas and on site.
