

Kseibi Telescopic Inspection Mirror with Fixed Shaft Handle

See into hard-to-reach spaces with confidence

Kseibi · 211305

Highlights

- Telescopic design helps reach confined spaces
- Zinc plated construction for everyday durability
- Orange plastic-coated handle improves grip
- Ideal for vehicle, workshop, and maintenance checks
- Round mirror head helps view hidden areas
- Jointed head allows angled inspection
- 25-1/4 in. overall size for extended reach
- Useful for checking behind, below, and inside equipment
- Easy to handle for precise visual inspection
- Supplied in blister card packing

Key Features

- Telescopic Reach — Extends your viewing access into narrow, recessed, and obstructed spaces where direct sight is difficult.
- Zinc Plated Build — The zinc plated body is suited to regular use in garages, workshops, and general maintenance settings.
- Comfort Grip Handle — An orange plastic-coated handle offers a more secure and comfortable hold during detailed inspection work.
- Angled Viewing Control — The jointed mirror head helps you position the mirror for better visibility around corners and behind components.
- Practical 25-1/4 Inch Size — Provides useful reach for inspecting under equipment, inside housings, and behind fixed installations.
