

Kseibi PE Funnel with Stainless Steel Filter Mesh

Cleaner pouring with built-in filter control

Kseibi · 211365

Highlights

- Integrated stainless steel filter mesh helps catch debris
- PE construction for practical everyday use
- Flexible spout supports easier access to tight openings
- Bright orange finish is easy to spot in storage
- 145 mm size for compact handling and storage
- Wide mouth helps with smoother filling
- Useful for workshop, garage and household transfer jobs
- Designed for cleaner, more controlled pouring
- Suitable for general liquid transfer tasks
- Supplied in hanging card packing

Key Features

- Built-in filter mesh — The stainless steel filter mesh helps trap particles during pouring for cleaner transfer work.
- PE body — Made from PE for a practical balance of lightweight handling and everyday durability.
- Flexible spout design — The long spout shown in the image helps direct flow into narrower or harder-to-reach openings.
- Compact 145 mm size — Easy to handle, store and keep ready for routine workshop and household tasks.
- High-visibility orange finish — The bright orange plastic body is easy to identify quickly in tool storage or on the bench.
