- ABS housing helps withstand everyday jobsite use
- Hands-free headlamp keeps both hands available
- Compact lamp unit supports easy everyday carrying
- Useful for repairs, maintenance and inspections
- Head-mounted beam follows your line of sight
- Adjustable strap design shown for a secure fit
- Suitable for contractor, workshop and home use
- Supplied in double blister packing

Key Features

- 160 Lumen LED Output — Provides clear, practical illumination for close work, movement in low light and general task visibility.
- Rechargeable Convenience — Built for repeat use without the hassle of constantly replacing disposable batteries.
- Durable ABS Construction — The ABS body offers a solid, work-ready build suited to regular use in demanding environments.
- Hands-Free Operation — Head-mounted lighting keeps both hands free for tools, materials and more controlled working.
- Adjustable Wearable Design — The strap-style design shown in the image helps keep the lamp in place while you work or move.
