

# Kseibi 3-Compartment Steel Tool Box 420 x 200 x 160 mm

**Organized steel storage with fast access**

Kseibi · 221005

## Highlights

- 3-compartment layout keeps tools better organized
- Double-layer cantilever design opens for easy access
- Steel construction for dependable everyday storage
- 420 x 200 x 160 mm compact workshop-friendly size
- 0.6 to 0.8 mm steel thickness for solid structure
- Spacious lower compartment for larger hand tools
- Upper trays help separate small parts and essentials
- Rigid carry handle for simple transport
- Black and orange finish is easy to spot on site
- Suitable for workshop, garage and mobile tool storage

## Key Features

- Three-compartment organization — The double-layer interior creates three practical storage sections to separate small items from larger hand tools.
- Steel body construction — Made from steel for reliable everyday durability and a sturdy feel during transport and use.
- Cantilever opening design — The opening mechanism spreads the upper trays apart for clearer visibility and quicker access to contents.
- Compact carrying size — At 420 x 200 x 160 mm, it offers useful storage capacity without taking up excessive space.
- High-visibility finish — The black base with orange top layers and handle gives the toolbox a professional look that stands out clearly.
