

Kseibi 250mm Plastic Funnel with Stainless Steel Filter Mesh

Wide funnel. Cleaner transfer.

Kseibi · 221370

Highlights

- 250mm funnel for easier filling from larger containers
- Made from PP plastic for everyday practical use
- Stainless steel filter mesh helps catch debris
- Wide mouth improves capture during pouring
- Tapered spout helps direct flow into narrow openings
- Bright orange colour is easy to spot on the job
- Useful for garage, workshop and utility tasks
- Rigid body supports controlled liquid transfer
- Side tab allows easy grip or hanging storage
- Supplied in hanging card packing

Key Features

- Large 250mm Opening — The wide mouth gives you a larger target area, helping reduce spills when pouring from bigger or awkward containers.
- Stainless Steel Filter Mesh — Built-in mesh helps screen out debris during transfer for cleaner pouring into tanks, bottles or other containers.
- PP Plastic Construction — Made from PP for a lightweight, practical funnel suited to routine workshop, garage and general maintenance use.
- Tapered Pouring Spout — The narrow outlet is shaped to guide liquid into smaller openings with better control and less splashing.
- Easy-to-Spot Orange Finish — The bright orange body is easy to identify quickly in tool storage, on a bench or around the work area.
