

Kseibi PROGRIP Round Tip Bricklaying Trowel

Comfort grip control for everyday bricklaying

Kseibi · 281320

Highlights

- Round tip blade for smooth mortar pickup and shaping
- PROGRIP soft-grip handle supports comfortable use
- Contoured handle helps maintain a secure hold
- Textured grip aids control in site conditions
- Steel blade construction visible in the product image
- Angled shank improves working clearance
- Suitable for bricklaying and general masonry tasks
- Useful for spreading, buttering and trimming mortar
- Balanced hand feel for controlled application
- Practical choice for trade and DIY use

Key Features

- Round tip blade shape — The rounded end helps with smooth mortar pickup, spreading and shaping during bricklaying and masonry work.
- PROGRIP comfort handle — A bi-material handle with soft-grip sections is designed to improve comfort during repeated use.
- Textured secure hold — The handle surface shown in the image provides added grip for confident control while working.
- Angled shank design — The handle sits above the blade on an angled shank, helping with hand clearance and tool control.
- Versatile masonry use — Well suited to carrying, placing, buttering and trimming mortar for brick and block work.
