

Kseibi Rubber Grout Float 250 x 95 x 13mm

Controlled grout application made simple

Kseibi · 282540

Highlights

- ▣ Rubber base designed for grout application
- ▣ 250 x 95 x 13 mm working size
- ▣ Comfortable raised handle for secure grip
- ▣ Rectangular float shape for controlled passes
- ▣ Helps press grout into tile joints evenly
- ▣ Suitable for wall and floor tiling work
- ▣ Flat base supports steady surface contact
- ▣ Useful for installation, renovation, and repairs
- ▣ Simple, practical tool for tiling kits
- ▣ Supplied in label white box packing

Key Features

- ▣ Rubber Base — Built with a rubber base suited to spreading grout and working it into tile joints with controlled pressure.
- ▣ Practical Working Size — The 250 x 95 x 13 mm format offers a balanced size for coverage, handling, and control during grout application.
- ▣ Comfortable Handle — The raised handle design shown in the image supports a secure grip for repeated passes across tiled surfaces.
- ▣ Rectangular Float Profile — Its flat rectangular shape helps maintain steady contact across tile faces for consistent grout spreading.
- ▣ Versatile Tiling Use — Suitable for general wall and floor tiling, from new installations to renovation and repair work.
