

Kseibi Double-Edged Wallboard Saw 150mm

Fast, controlled cuts in wallboard

Kseibi · 282576

Highlights

- 150 mm wallboard saw for compact, controlled cutting
- Double-edged blade helps in tight and awkward spaces
- Machine-ground teeth support efficient cutting action
- Quench-hardened blade for dependable durability
- 1.2 mm blade balances strength and control
- Pointed tip helps start plunge cuts with precision
- Polished surface promotes smooth cutting movement
- Two-tone handle offers a secure, comfortable grip
- Black TPR grip helps maintain control during use
- Ideal for drywall openings, repairs and trim work

Key Features

- Double-Edged Blade — Designed for practical cutting access and better maneuverability when working in confined areas or cutting from different angles.
- Machine-Ground Teeth — Teeth are machine-ground to support consistent cutting performance through wallboard and similar sheet material.
- Quench-Hardened Construction — The blade is quench-hardened to improve durability for repeated use on installation, repair and renovation tasks.
- Compact 150 mm Format — The shorter blade length is easy to control for cut-outs, shaping and detailed work where a larger saw can feel cumbersome.
- Comfort Grip Handle — Orange plastic coating with black TPR creates a secure, comfortable handle for better grip and control while sawing.

Specifications

Blade style Double-edged pointed wallboard saw
