

Kseibi 150mm Wallboard Saw

Compact control for clean wallboard cuts

Kseibi · 282579

Highlights

- 150 mm blade for controlled, compact cutting
- 1.2 mm blade thickness for solid feel in use
- Machine-ground teeth for efficient cutting action
- 7 TPI blade suited to wallboard cutting tasks
- Quench-hardened blade for dependable durability
- Polished surface helps the blade move cleanly
- Pointed tip supports easy cut starts
- Orange and black two-tone handle for visibility
- Black TPR grip helps improve comfort and control
- Ideal for drywall, plasterboard and similar boards

Key Features

- Quench-Hardened Blade — Built with quench-hardened steel construction to support long-term cutting performance and durability on demanding board work.
- Machine-Ground 7 TPI Teeth — Machine-ground teeth with a 7 TPI pattern deliver controlled, efficient cutting through drywall and wallboard materials.
- Compact 150 mm Format — The 150 mm blade length offers good manoeuvrability for tight spaces, detail cuts and general installation tasks.
- Comfort Grip Handle — The orange and black two-tone handle uses plastic coating and black TPR to provide a secure, comfortable hold.
- Pointed Blade Profile — The pointed nose design helps you start cuts more easily when working on openings, trimming and interior board adjustments.
