

Kseibi Mason's Bolster Chisel with Octagonal Shank

Built for controlled masonry cutting

Kseibi · 284065

Highlights

- Carbon steel construction for durability
- Black powder-coated surface finish
- Protruding chisel tip for masonry work
- Octagonal shank for solid control
- 250 x 16 x 50 mm tool format
- Broad hand guard helps confident striking
- Soft-grip style handle shown in image
- Suitable for breaking and trimming masonry
- Practical choice for repair and renovation
- Supplied in box packing

Key Features

- Carbon Steel Build — Made from carbon steel to provide the toughness needed for repeated masonry cutting and breaking tasks.
- Black Powder-Coated Finish — The black powder-coated surface adds a durable finish suited to workshop and jobsite use.
- Protruding Chisel Tip — Designed with a protruding chisel tip to help focus impact for effective breaking, trimming and removal work.
- Octagonal Shank Control — The octagonal shank supports a steady grip and dependable handling when accuracy and control are important.
- Guarded Grip Handle — The handle shown features textured grip areas and a broad guard to improve comfort and confidence during use.
