

KSEIBI Drywall Panel Lifter 3.35m

Lift Drywall Higher With Less Strain

Kseibi · 286010

Highlights

- Lifting height up to 3.35 m
- Supports loads up to 68 kg
- Original height of 1.22m for workable loading
- Manual hand-wheel lift system for controlled raising
- Wide support arms help hold drywall panels in place
- Tripod-style base supports stable positioning
- Caster wheels help move the lifter around the site
- Designed for ceiling and wall drywall installation
- All-black finish for a professional jobsite look
- Helps reduce strain during overhead panel handling

Key Features

- 3.35m Lifting Height — Raises drywall panels up to 3.35 m, helping you position boards for overhead and high wall installations.
- 68kg Load Capacity — Built to support loads up to 68 kg for controlled handling of drywall panels during installation.
- Manual Lift Control — The hand-wheel mechanism shown in the image allows steady, deliberate raising for better positioning accuracy.
- Mobile Tripod Base — A tripod-style base with caster wheels helps you move the lifter into place and set up where needed on site.
- Jobsite-Ready Design — The all-black frame and broad panel supports shown in the image are suited to practical everyday contractor use.
