

Kseibi Hand-Crank Flicker Machine

Manual operation, durable metal build

Kseibi · 291260

Highlights

- Painted iron sheet construction
- Manual side crank for simple operation
- Integrated top handle for carrying
- Compact enclosed metal housing
- Comfort-grip crank handle
- Suitable for workshop and site use
- Bright painted finish for easy visibility
- Solid body helps protect internal parts
- Easy to move, store, and position
- Practical design for repeated daily use

Key Features

- Iron Sheet Body — Made from iron sheet for a sturdy, work-ready construction suited to regular handling.
- Painted Surface Finish — The painted finish gives the machine a clean exterior and a durable workshop-ready look.
- Manual Crank Operation — A side-mounted crank provides direct manual control for straightforward use without added complexity.
- Built-In Carry Handle — The top handle makes it easier to lift, carry, and reposition the machine as needed.
- Enclosed Compact Design — The closed housing keeps the tool compact and helps protect the mechanism during transport and storage.
