

Kseibi Dual Cartridge Caulking Gun

Controlled dispensing for dual-cartridge jobs

Kseibi · 291795

Highlights

- Designed for dual-cartridge dispensing applications
- Twin-rod frame supports balanced pressure
- Trigger handle helps improve application control
- Rigid metal body for dependable jobsite use
- Open-frame design allows straightforward loading
- Suitable for sealing, bonding and repair tasks
- Helps achieve cleaner, more consistent bead placement
- Long barrel form supports cartridge stability
- Manual operation offers direct dispensing control
- Practical choice for professional and DIY work

Key Features

- **Dual-Cartridge Format** — Designed to work with dual-cartridge systems for two-part dispensing applications where even pressure and controlled output are important.
- **Twin Guide Rod Construction** — The twin-rod layout helps keep the frame aligned and supports balanced force through the cartridge during use.
- **Rigid Metal Frame** — A robust metal body gives the tool a solid, durable feel suited to regular decorating, maintenance and repair work.
- **Trigger-Style Operation** — The hand-trigger mechanism provides familiar manual control, helping users dispense material steadily and place it accurately.
- **Open Loading Design** — The open-frame construction makes cartridge insertion and removal simpler while keeping the cartridge supported during application.
