

Kseibi Wall Tile Regulator

Controlled tile positioning for cleaner wall installation

Kseibi · 292090

Highlights

- Designed for adjusting and supporting wall tiles
- High quality tool steel construction
- Painted finish for added surface protection
- Hand lever action for controlled pressure
- Spring-loaded mechanism supports smooth adjustment
- Orange body is easy to identify on site
- Broad base helps maintain stable contact
- Useful for installers, renovators and DIY tilers
- Helps improve tile positioning during fitting
- Supplied in blister card packing

Key Features

- Tool steel build — Made from high quality tool steel for dependable strength and durability in demanding tiling tasks.
- Controlled adjustment — The lever-operated design helps apply pressure in a controlled way when positioning wall tiles.
- Stable support points — Wide contact areas and a guided frame help keep the tool steady while making installation adjustments.
- Painted surface finish — The painted finish adds a protective layer and gives the regulator a durable, work-ready appearance.
- Easy-to-spot body — The orange body stands out in the toolbox or on site, making the regulator quick to find when needed.
