

Kseibi Gray Bitumen Polymer Waterproof Membrane Roll

Reliable waterproofing in a practical roll

Kseibi · 295907

Highlights

- Bitumen/polymer membrane for waterproofing tasks
- Gray waterproofing sheet for clean, professional use
- 1m x 10m roll supports efficient area coverage
- Flexible roll format is easy to handle and position
- Continuous sheet helps reduce unnecessary joins
- Designed specifically as a waterproofing membrane
- Supplied on a paper tube for practical storage
- Suitable for contractors, maintenance, and DIY use
- Can be cut to fit the area being covered
- Kseibi membrane for dependable moisture protection

Key Features

- Bitumen Polymer Construction — Made from bitumen and polymer for a waterproofing sheet designed to form an effective moisture barrier.
- 1m x 10m Roll Size — Large roll format helps cover wider areas efficiently and simplifies planning for waterproofing work.
- Flexible Sheet Format — The membrane unrolls smoothly and can be positioned and cut to match the installation area.
- Continuous Waterproof Layer — Roll form makes it easier to create a consistent sheet barrier across the surface being treated.
- Practical Jobsite Handling — Supplied on a paper tube for straightforward transport, storage, and handling before installation.

Specifications by Variant

Specification	295907
Color	Gray
Size	1m*10m (paper tube)
Material	Bitumen/Polymer

Feature	Waterproofing Sheet
