

Kseibi 12" Stainless Steel Combination Square

Measure, mark and square with confidence

Kseibi · 303591

Highlights

- 12-inch combination square for measuring and layout work
- Stainless steel body for durability in everyday use
- Black handle provides a solid, easy-to-grip head
- Built-in spirit level helps with alignment checks
- Locking screw secures the rule in position
- Suitable for checking 90° and 45° references
- Clearly marked rule supports fast reading and marking
- Useful for carpentry, joinery and metalworking tasks
- Helps mark straight lines and repeatable measurements
- Compact multi-use design reduces tool changes

Key Features

- Stainless steel rule — The stainless steel body offers durable performance for regular measuring, marking and checking tasks.
- 12-inch size — The 12" rule gives a practical working length for common workshop, site and DIY applications.
- Integrated spirit level — A built-in bubble vial helps you quickly check alignment while setting out or inspecting work.
- Locking adjustment — The knurled locking screw holds the rule securely where you set it for consistent marking.
- Multi-purpose layout tool — Use it to measure, mark straight lines and verify common angles during cutting, fitting and assembly.
