

Kseibi Folding Ruler & Hole Locator Kit

Fold, set and mark with confidence

Kseibi · 304005

Highlights

- Stainless steel construction for dependable durability
- Folding multi-arm design adapts to angles and irregular shapes
- Helps transfer layouts quickly from one surface to another
- Useful for tiling, flooring, woodworking and fitting work
- Integrated hole locator aids accurate mark positioning
- Clear marked scales visible on each ruler arm
- Compact foldable form stores easily in a toolbox
- Supports repeatable measurements for consistent results
- Ideal for marking cut-outs, corners and edge profiles
- Supplied in blister card packing

Key Features

- Folding layout system — Linked ruler arms open and fold to match angles, corners and irregular outlines for quicker template-style marking.
- Hole locator function — The locator section helps position and mark holes or circular cut-out points with better consistency.
- Stainless steel build — Made from stainless steel for strength and reliable performance in regular workshop or on-site use.
- Clear measuring reference — Visible scale markings along the arms help with transferring and repeating measurements during layout work.
- Toolbox-friendly design — The foldable construction packs down neatly, making it easy to carry, store and keep close at hand.
