Key Features

- Compact 12 inch / 300 mm size — The manageable size helps you work with better control and makes the saw easier to use in confined or awkward spaces.
- High carbon steel build — Made from high carbon steel for reliable strength and durability in regular cutting and maintenance applications.
- Mini frame for tighter access — The smaller frame profile is well suited to jobs where a full-size hacksaw is harder to position comfortably.
- Shaped handle design — The handle is contoured for a secure hold, helping you guide the saw steadily through controlled cutting strokes.
- Practical everyday versatility — Useful for repair, installation and workshop tasks that call for a straightforward manual cutting tool with good maneuverability.
