

KSEIBI T12 Carbon Steel Triangular File

Precise filing for corners and grooves

Kseibi · 311365

Highlights

- Made from T12 carbon steel
- Triangular file shape for internal angles
- Ideal for corners, grooves and notches
- Comfortable black and orange handle
- Secure grip for better filing control
- Suitable for shaping and smoothing tasks
- Pointed profile reaches tighter spaces
- Practical choice for workshop use
- Manual tool for precise material removal
- Handle includes hanging hole for storage

Key Features

- T12 Carbon Steel Construction — Built from T12 carbon steel for durable performance in regular hand filing and finishing work.
- Triangular Filing Profile — The three-sided shape helps you work accurately in corners, grooves, internal angles and narrow sections.
- Controlled Hand Use — Designed for steady manual filing when shaping edges, refining surfaces or cleaning up detailed areas.
- Ergonomic Handle — The contoured handle shown in the image is designed to sit comfortably in the hand for better grip and control.
- Easy to Store — A hanging hole in the handle makes it simple to keep the file accessible in a workshop or tool area.
