

Kseibi No.4 Adjustable Bench Plane 2 in

Classic smoothing control for everyday woodworking

Kseibi · 311730

Highlights

- No.4 bench plane for smoothing and general woodworking
- 2 in plane format for controlled hand-planing
- Adjustable mechanism helps fine-tune the cut
- HSS blade supports consistent cutting performance
- Front knob and rear handle aid two-handed control
- Suitable for boards, edges and prepared wood surfaces
- Useful for workshop, joinery and DIY applications
- Helps refine rough areas and improve surface finish
- Box packed for convenient storage or gifting
- Kseibi hand tool design with visible adjustment hardware

Key Features

- Adjustable cutting setup — The plane includes accessible adjustment hardware so you can fine-tune blade position for the job and desired finish.
- HSS blade material — Fitted with an HSS blade, it is suited to regular woodworking tasks where reliable cutting performance is important.
- Versatile No.4 format — The No.4 size is a proven workshop choice for smoothing faces, trimming high spots and handling general bench work.
- Comfortable hand control — A rounded front knob and shaped rear handle support a steady, secure grip for guided two-handed use.
- Made for clean finishing passes — Ideal for refining timber surfaces before final finishing, helping you achieve a smoother result with hand-tool precision.
