

Kseibi 60W Two-Power Soldering Iron

Steady 60W heat for everyday soldering

Kseibi · 331296

Highlights

- 60W power for general-purpose soldering tasks
- Iron construction for dependable everyday use
- Pointed tip supports accurate solder placement
- Corded design for continuous plug-in operation
- Suitable for wiring, repairs and hobby projects
- Slim shaft helps access tighter work areas
- Ribbed handle section aids grip and control
- Simple setup with familiar plug-in format
- Good choice for home, garage or workshop use
- Built for routine maintenance and assembly work

Key Features

- 60W Output — Provides the heat capacity needed for common soldering, repair and connection work.
- Pointed Precision Tip — The fine pointed tip shown in the image helps target smaller joints and detail work more accurately.
- Corded Plug-In Design — Offers continuous operation without charging, making it convenient for bench and workshop use.
- Iron Build — Iron material supports a durable, practical tool for regular soldering tasks.
- Grip-Friendly Handle — The ribbed handle section shown in the image helps promote a steadier, more controlled hold.
