

Kseibi European Hand Wire Brush, Brass Coated 4x16 Row

Reliable surface prep in your hand

Kseibi · 331410

Highlights

- Brass-coated wire brush for surface preparation
- Copper-plated wire bristles, 0.3 mm thick
- 4x16 row layout for even brushing coverage
- Wooden handle for a secure, comfortable grip
- Suitable for rust, scale and residue removal
- Helps prepare surfaces before painting or repair
- Curved handle shape supports controlled strokes
- Pointed handle end includes hanging hole
- Compact hand brush for workshop and site use
- Simple, dependable tool for cleaning tasks

Key Features

- **0.3 mm Wire Bristles** — Copper-plated wire bristles with 0.3 mm thickness provide effective brushing action for cleaning and surface prep tasks.
- **Brass-Coated Construction** — The brass-coated wire design is made for dependable hand-cleaning performance on demanding workshop and maintenance jobs.
- **4x16 Row Pattern** — A 4x16 row configuration gives a practical balance of surface coverage and brushing control.
- **Wooden Handle** — The wooden handle offers a comfortable feel in hand and a traditional, durable brush body for repeated use.
- **Easy to Store** — A hanging hole in the handle makes the brush convenient to store on a hook or pegboard between tasks.
