

Kseibi 10 in Brass-Coated Wire Hand Brush

Controlled cleaning for tough surface prep

Kseibi · 331620

Highlights

- 10 in hand brush for surface preparation and cleaning
- Brass-coated wire for abrasive brushing action
- 0.3 mm wire thickness for controlled scrubbing
- Contoured orange plastic handle for grip and comfort
- Useful for rust, paint and grime removal
- Slim brush shape helps reach edges and narrow areas
- Suitable for workshop, garage and jobsite tasks
- Good for preparing hard surfaces before repainting
- Manual cleaning tool with simple, dependable design
- Easy to keep on hand for maintenance and touch-up work

Key Features

- Brass-coated wire fill — Built with brass-coated wire to help remove rust, loose paint, dirt and surface buildup from hard materials.
- 0.3 mm wire thickness — The specified wire thickness offers effective brushing action for controlled surface cleaning and prep work.
- 10-inch overall size — A 10-inch length gives a practical balance of reach, handling and control for day-to-day brushing tasks.
- Contoured plastic handle — The orange handle is shaped with finger contours to support a steadier, more comfortable grip during use.
- Versatile prep and cleaning tool — A useful choice for paint preparation, maintenance jobs, workshop cleanup and general-purpose manual abrasion.
