

Kseibi PVC Safety Goggles with Indirect Vent

Clear Protection with Indirect Venting

Kseibi · 381428

Highlights

- Transparent lens for clear, unobstructed vision
- Indirect vent design helps reduce direct particle entry
- Four breathing valves support airflow during wear
- PVC body offers flexible, enclosed eye coverage
- White strap helps keep goggles securely in place
- Wraparound shape gives broad protective coverage
- Suitable for workshop, maintenance and DIY tasks
- Comfort-focused design for regular day-to-day use
- Easy choice for general safety and workwear needs
- Practical eyewear for dusty or splash-prone jobs

Key Features

- Transparent Lens — The clear lens supports a full view of the task at hand, helping you work accurately without tinted distortion.
- Indirect Ventilation — An indirect vent layout helps improve airflow while reducing the direct path for dust and minor splashes.
- Four Breathing Valves — Four integrated breathing valves contribute to ventilation, supporting comfort during active use.
- Flexible PVC Construction — The PVC frame is designed to provide enclosed eye protection with a flexible fit around the face.
- Secure Strap Fit — A white strap keeps the goggles positioned securely, making them practical for movement on site or in the workshop.
