

# Kseibi WG100 Welding Goggles with Dark Lens

Dark-lens protection for welding tasks

Kseibi · 382016

## Highlights

- Dark lens design for welding-related tasks
- Lightweight plastic construction for easy wear
- Enclosed goggle shape helps cover the eye area
- Adjustable head strap for a secure fit
- Orange and black two-tone finish
- Compact design stores easily in a toolbox
- Suitable for workshop, fabrication and maintenance use
- Close-fitting profile for stable wear while moving
- Simple, practical design for everyday jobsite use
- Built by Kseibi for dependable trade use

## Key Features

- Dark Lens Protection — Fitted with dark lenses suited to welding tasks where bright light and glare are part of the job.
- Lightweight Plastic Body — Plastic construction helps keep the goggles easy to wear, handle and carry between tasks.
- Secure Strap Fit — The elastic head strap helps keep the goggles comfortably in place during active workshop work.
- Enclosed Eye Coverage — The wraparound goggle form helps provide consistent coverage around the eye area while you work.
- Workshop-Ready Design — A simple, durable build and high-visibility two-tone finish make these goggles practical for regular use.
