

Kseibi Faceshield with Clear Lens

Clear visibility, practical face coverage

Kseibi · 382100

Highlights

- HDPE material helmet for practical daily use
- Transparent PC sheet visor for clear visibility
- Aluminum alloy frame supports the shield
- Clear lens helps maintain sight of the work area
- Helmet-style design offers stable face coverage
- Bright orange helmet is easy to identify
- Suitable for workshops, maintenance and DIY tasks
- Full-face visor shape covers the front of the face
- Simple construction for straightforward everyday wear
- Professional PPE option for general task protection

Key Features

- HDPE Helmet Shell — The helmet is made from HDPE material, offering a practical and lightweight top section for regular protective use.
- Transparent PC Visor — The clear visor is made from a transparent PC sheet, helping you maintain visibility while working.
- Aluminum Alloy Frame — An aluminum alloy frame supports the visor structure and adds dependable reinforcement to the shield assembly.
- Clear Lens Design — The clear lens keeps the field of view open, making it easier to monitor tools, materials and task progress.
- High-Visibility Orange Helmet — The orange helmet section stands out clearly in workshop and site settings for quick visual identification.
