

KSEIBI FFP2 Particulate Respirator with Valve

FFP2 Protection with Easier Exhalation

Kseibi · 391018

Highlights

- FFP2 compliant particulate respirator
- Integrated exhalation valve for easier breathing out
- Cup-style shape helps maintain structure in use
- Elastic head straps support a secure fit
- Integrated nose clip visible for closer adjustment
- Lightweight non-woven construction
- Suitable for dusty work environments
- Clean white finish with branded valve cover
- Designed for professional and DIY jobsite use
- Practical respiratory protection from KSEIBI

Key Features

- FFP2-Compliant Protection — Built to an FFP2-compliant standard for particulate respiratory protection in work environments where dust control matters.
- Exhalation Valve — The front-mounted valve helps make exhalation easier, supporting comfort during active tasks and longer periods of wear.
- Structured Cup Design — The shaped cup profile helps the respirator hold its form over the nose and mouth for practical day-to-day use.
- Secure Strap Fit — Elastic head straps are designed to keep the respirator positioned securely while you move through the job.
- Adjustable Nose Area — A visible integrated nose clip helps improve fit and stability for a closer seal around the upper face.
