

Kseibi Double Filter Chemical Respirator

Dual filters for practical everyday protection

Kseibi · 391065

Highlights

- Double-filter design for balanced airflow
- Rigid plastic body for durable daily use
- Half-mask style keeps eye area clear
- Contoured facepiece supports a secure fit
- Visible front valve helps smoother exhalation
- Suitable for chemical and workshop tasks
- Compact design stores easily between jobs
- Works well for paint prep and maintenance
- Face-sealing edge adds wearing comfort
- Supplied in practical box packing

Key Features

- Double Filter Layout — Twin side filters create a balanced respirator design suited to chemical work, workshop use and repetitive task environments.
- Durable Plastic Construction — The plastic body provides a rigid, hard-wearing structure designed for regular handling on site, in the garage or in the workshop.
- Comfort-Focused Face Seal — A cushioned-looking edge around the mask helps the respirator sit more comfortably against the face during longer jobs.
- Front Exhalation Valve — The central valve design supports easier outward airflow, helping improve comfort while you work through demanding tasks.
- Half-Mask Practicality — The low-profile half-mask format keeps the eye area open, making it a practical choice for jobs needing clear forward vision.
