

Kseibi RC 203 Chemical Respirator Cartridge

Reliable replacement for spray-paint respirators

Kseibi · 391075

Highlights

- Replacement chemical respirator cartridge
- Designed for spray-paint respirator use
- RC 203 cartridge marking shown on product
- Compact cylindrical cartridge format
- Protective vented top structure
- Suitable for routine respirator maintenance
- Helps keep compatible respirators job-ready
- Clear product identification on cartridge body
- Useful for workshops, garages and trade settings
- Practical consumable for safety equipment stock

Key Features

- Replacement Cartridge Format — Built as a dedicated respirator cartridge, making it a practical replacement part for ongoing safety equipment maintenance.
- Spray-Paint Application — Marked for spray-paint respirator use, making it suitable for environments where paint-related airborne exposure is a concern.
- Compact Low-Profile Shape — The cylindrical cartridge form helps keep respirator setups compact and manageable during regular working use.
- Protected Filter Face — The vented outer top helps shield the cartridge face during handling, storage and fitting.
- Clear Product Marking — Visible RC 203 identification on the cartridge body helps with quick recognition when checking or replacing components.
