

Kseibi PROGRIP Gel Knee Pads

Gel comfort for hard-working knees

Kseibi · 402010

Highlights

- Gel material helps cushion knees during prolonged kneeling
- Hard outer shell shown in image adds a durable contact surface
- Breathable mesh-style body supports day-long comfort
- Contoured shape fits around the knee for supportive wear
- Adjustable strap design helps keep pads in place
- Black finish suits professional jobsite use
- Useful for flooring, tiling, carpentry and maintenance work
- Helps reduce discomfort on hard workshop and site surfaces
- Designed for trade professionals and serious DIY users
- Supplied in hanging card packing for easy display and storage

Key Features

- Gel cushioning — Gel material helps absorb pressure and improve comfort during extended kneeling tasks.
- Protective outer cap — The molded hard front shell shown in the image provides a durable surface against rough floors and work areas.
- Breathable body — A mesh-style fabric construction visible in the image helps support airflow and more comfortable wear.
- Secure strap fastening — Visible adjustable straps help keep the knee pads positioned as you move between kneeling and standing.
- Trade-ready design — Suitable for construction, installation, repair and general kneeling jobs where comfort and protection matter.
