Straightforward fall protection for everyday site work

Kseibi · 421020

Highlights

- Complete kit with safety harness and twisted rope lanyard
- Basic 1 D-ring design for straightforward rear attachment
- Polyester webbing construction for durable daily use
- Shoulder, chest and leg straps help maintain secure positioning
- Clean, simple layout for easy pre-use visual checks
- Rear D-ring is easy to identify and access
- Flexible webbing supports movement while working
- Suitable for construction, maintenance and inspection tasks
- Practical choice for issue to crews and site teams
- Jobsite-ready setup for compatible fall-protection systems

Key Features

- **Basic 1 D-Ring Configuration** — Designed with a single rear D-ring connection point for a simple, easy-to-understand harness setup.
- **Polyester Webbing Build** — Made from polyester webbing to provide a durable and hard-wearing foundation for regular site use.
- **Twisted Rope Lanyard Included** — Supplied as a kit with a twisted rope lanyard, helping you equip users with a complete basic solution.
- **Secure Full-Body Layout** — The shoulder, chest and leg strap arrangement helps support proper positioning and dependable wear.
- **Easy to Inspect and Use** — Visible webbing paths, hardware and rear connection point help make pre-use checks and attachment more straightforward.
