

Kseibi Shock Absorbing Safety Lanyard with Double Hooks

Secure tie-off with twin-hook flexibility

Kseibi · 422006

Highlights

- Shock-absorbing lanyard for work-at-height safety
- Double hooks support secure connection during repositioning
- Polyester webbing offers durable everyday performance
- Integrated shock pack helps manage fall forces
- Large metal hooks are easy to attach on site
- Reinforced stitched sections add jobsite confidence
- Suitable for construction, roofing and maintenance work
- Flexible webbing helps reduce restriction while moving
- Includes storage pouch for transport and organization
- High-visibility pack is easy to identify in gear

Key Features

- Shock Absorbing Design — Built with an integrated shock absorber to support fall-arrest applications where controlled energy absorption is essential.
- Double Hook Configuration — Twin hooks help users stay connected while moving between anchor points, improving workflow during repositioning.
- Polyester Webbing — The lanyard uses polyester webbing for a durable, flexible construction suited to regular professional use.
- Heavy-Duty Metal Hardware — Large metal hooks and connector hardware are designed for secure attachment and dependable handling on site.
- Ready for Jobsite Use — A visible shock pack, reinforced stitched areas and included pouch make this lanyard practical to carry, store and deploy.
