

Kseibi Aluminium Square

Square layout made simple

Kseibi

Highlights

- Aluminium construction for lightweight everyday use
- Designed for measuring, marking and checking right angles
- Available in 250mm and 300mm sizes
- Ruled blade helps with clear, quick layout work
- Square head provides a stable reference edge
- Suitable for carpentry, joinery and DIY tasks
- Integrated spirit level visible in the square head
- Easy to carry between workshop and jobsite
- Useful for checking corners before fixing or assembly
- Simple tool for fast, repeatable line marking

Key Features

- Aluminium Body — Made from aluminium for a practical combination of light weight and everyday durability.
- Clear Ruled Edges — Graduated markings on the blade help you measure and transfer lines with confidence.
- 90-Degree Reference — Built to help mark, check and verify square corners on timber, panels and other materials.
- Integrated Spirit Level — A visible bubble vial in the head adds extra utility when checking level during layout work.
- Two Size Options — Choose between 250mm and 300mm sizes to suit compact jobs or broader layout tasks.
