

Kseibi Forged Club Hammer with Wooden Handle

Forged for powerful, controlled striking

Kseibi

Highlights

- Drop forged carbon steel head for durable striking strength
- High-frequency hardened head for demanding repeated use
- Black textured head coating with polished striking sides
- Wooden handle offers a traditional, secure hand feel
- Head hole filled with black resin adhesive for added hold
- Double-faced club hammer design for versatile heavy tasks
- Ideal for masonry work, demolition and chisel driving
- Compact head shape helps in tighter working areas
- Available in 1000G, 1250G and 1500G weights
- Black-finish head with natural wood handle

Key Features

- Drop Forged Carbon Steel Head — The head is made from drop forged carbon steel to deliver the toughness needed for repeated heavy striking jobs.
- High-Frequency Hardened — High-frequency hardening helps the hammer stand up to demanding use in construction, masonry and workshop tasks.
- Protected Head Finish — A black textured coating covers the head, while both sides are polished to provide clean, ready-to-work striking faces.
- Traditional Wooden Handle — The wooden handle provides a familiar grip and controlled handling for forceful blows and general site work.
- Choice of Weights — Available in 1000G, 1250G and 1500G versions so you can match the hammer to the job and your preferred striking power.
