

12-POINT / OPENING

A 12-point opening doubles the access angles of a 6-point. To prevent round-off, it contacts and applies force to the flat sides of fastener heads rather than the corners.

Kseibi Metric CR-V Combination Wrench

12-point access for everyday fastening

Kseibi

Highlights

- Made from durable CR-V steel
- Chrome-plated surface finish
- Built to DIN3110 standard
- Combination design with open and ring ends
- 12-point ring end improves access angles
- Helps apply force to fastener flats
- Designed to reduce corner round-off
- Available in metric sizes 6mm to 32mm
- Suitable for repair, maintenance and assembly
- Supplied in hanging card packing

Key Features

- CR-V Steel Construction — Made from chrome vanadium steel for dependable strength in regular workshop, garage and site use.
- Chrome-Plated Finish — The chrome-plated surface gives the wrench a clean finish that is easy to wipe down after use.
- 12-Point Ring End — The ring end uses a 12-point opening for easier positioning and more access angles in tighter spaces.
- Fastener-Friendly Contact — The ring profile is designed to apply force to the flat sides of the fastener instead of the corners.
- Wide Metric Size Range — Available in sizes from 6mm to 32mm, making it easy to select the right wrench for the job.
