

Kseibi Crown Notched Plastering Trowel with Wooden Handle

Controlled spread for cleaner tiling work

Kseibi

Highlights

- Made from high quality tool steel
- Polished surface for smooth material spread
- Notched edge helps create even adhesive ridges
- 280 x 120 format suits general tiling tasks
- Natural wooden handle offers comfortable control
- Square notch option available in the range
- Anti-rust coating listed on selected variant
- Rigid blade supports accurate application
- Suitable for plaster, mortar and tile adhesive
- Designed for dependable everyday trade use

Key Features

- High quality steel construction — Manufactured from high quality tool steel for strength, rigidity and dependable use on plastering and tiling jobs.
- Polished working surface — The polished finish helps the blade move smoothly through adhesive, mortar and plaster for cleaner application.
- Notched application edge — The notched blade profile is designed to spread material evenly and form consistent ridges where coverage matters.
- Wooden handle grip — A natural wooden handle gives a traditional feel in hand and helps maintain control during repetitive spreading work.
- Variant choice for the task — Available in 280 x 120 format with listed notch configurations including square notch and U-profile feature options.
