

Kseibi Heavy Duty Rubber Curb Ramp

Smooth access over raised edges

Kseibi

Highlights

- Heavy duty rubber construction
- Helps bridge curbs and raised edges
- Textured top surface supports grip
- Suitable for wheeled equipment and trolleys
- Square footprint for stable positioning
- Available in two size options
- Compact design for easy placement
- Durable build for repeated use
- Practical for site, garage and loading areas
- Carton packed for straightforward delivery

Key Features

- Heavy Duty Rubber Build — Made from rubber with a heavy duty design to handle demanding day-to-day contractor use.
- Textured Traction Surface — Raised tread pattern across the top helps provide grip for wheels and foot traffic.
- Smooth Level Transition — Creates a gradual incline to reduce jolts when moving over curbs and raised edges.
- Two Size Options — Available in 500 x 500 x 160 mm and 500 x 500 x 120 mm configurations.
- Practical Worksite Use — A useful access aid for garages, loading points, storage areas and general site setup.
