

KSEIBI TileMax Diamond Cutting & Grinding Blade

Cut and grind with one diamond blade

Kseibi

Highlights

- Diamond blade for cutting and grinding applications
- Designed for tile work and hard surface jobs
- 15,000 max RPM rating shown on the blade
- Available in 100x20mm and 115x22.2mm sizes
- Flat disc profile supports steady contact
- Suitable for edge work and material removal
- Clear on-disc markings for quick identification
- Practical choice for renovation and fitting work
- KSEIBI TileMax branded accessory
- Safety pictograms shown for PPE guidance

Key Features

- Dual-purpose design — Made for both cutting and grinding tasks, helping reduce blade changes during tile work.
- Diamond abrasive surface — Diamond construction is intended for hard materials and everyday cutting and surface preparation jobs.
- Tool-matching size options — Available in 100x20mm and 115x22.2mm formats to suit different compatible setups.
- 15,000 max RPM marking — The blade is clearly printed with a 15,000 maximum RPM reference for setup and use guidance.
- Workshop and site ready — A practical accessory for tile installation, repairs, renovation work, and edge finishing.
